## WEB DEVELOPER & SOFTWARE ENGINEER

Unlike most developers, I started as an instructor. Teaching taught me to be a thorough and patient software engineer, dedicated to writing efficient, understandable code that I've continued to practice at each of my subsequent positions.

### EXPERIENCE

#### FULL STACK ENGINEER, THE PLAYERS' TRIBUNE

NYC, NY – 08/2018-PRESENT

- Write GoLang, TypeScript/JavaScript, SQL, PHP, Swift, yaml (for Kubernetes deployments) and Python for a host of projects.
- Develop the React/NextJS frontend and PHP Wordpress backend for the website.
- Create cronjobs to regularly scrape and clean data from around the web using Puppeteer and standard request libraries.
- Host and deploy services to assist the Data Team with GCP's app engine, Kubernetes, and Firebase.
- Bridge the US and Australian tech teams through weekly management meetings.
- Build tools to query User Metrics with Big Query, and Google Analytics.
- Set up integration with an array of 3rd parties such as Apple News, Salthru, and Flipboard.

#### SOFTWARE & DATA ENGINEER, PARKME / INRIX

LOS ANGELES, CA – 01/2017-08/2018

- Full stack Python development with Django framework with numerous libraries.
- Manage two offshore teams for iOS and Android.
- Improve prediction algorithm for parking lot occupancy worldwide with automated apps.

#### LEAD ENGINEER IN RESIDENCE, GENERAL ASSEMBLY

LOS ANGELES, CA – 09/2015-12/2016

- Instruct the Web Development Immersive Course, a 12-week web development bootcamp for adults focused on JavaScript and Ruby.
- Write and deliver over 80 lessons and labs on modern technologies to new developers.
- Received the highest rating of any Los Angeles Instructional Team in GA's History - 65 NPS, 4.8/5.

### EDUCATION

NORTHWESTERN UNIVERSITY, EVANSTON, IL – 06/2012
